Crucell is a global biotech company that focuses on the development, production and marketing of vaccines, recombinant proteins and antibodies to prevent and combat infectious and other diseases. Within Crucell talented, entrepreneurial people are working in a dynamic culture in which innovation and a ‘can do’ state of mind are the central points. In order to strengthen our team we are continuously looking for enthusiastic, talented people who have the ambition to develop themselves and can be of value to Crucell.

(Senior) Scientist Viral vaccines

**Location:** Leiden

**Hours:** 36-40

**Department:**
Innovation & Discovery Lab; Innovation Team

**Job description:**
For this position we are looking for a Scientist with a few years post-doc experience. The suitable candidate has an affinity with early research projects and he/she is able to cross the borders of own scientific discipline. This candidate will have responsibility for scientific input to a dedicated project, but also contribute with ideas to other ongoing research projects and actively participate in brain storm sessions. Innovation and creative thinking are important aspects of his/her previous performances, and are crucial for this position. For his/her dedicated project, the selected candidate will work closely with Project Manager and line scientist(s), and it will report directly to the Head of Innovation team. Lab work is not compulsory but it is possible.

**Minimum Qualifications:**
- PhD (molecular) biology/virology
- experience in *in vitro* and *in vivo* virological model systems
- experience in antibodies or vaccines R&D desirable

**Competences:**
- Highly creative, "out-of-box" thinker
- Communication skills
- Pro-active
- Reliable
- Independent
